

"I came to the program because I want to learn and I want better ideas about how to help my kids. Not only in the education part but the emotional part, too."

- Laticia, Family Focus participant

Laticia's Story

"I'm so proud of being a part of Family Focus because it helps me a lot with my kids. I didn't know before about these kinds of programs. It helped me a lot - before I couldn't leave my son because as soon as I'd leave he'd start to cry. But then once I participated in Family Focus, he's able to say 'Bye bye, Mommy!'"

"I'm so proud to be a part of the program. Family Focus supports me not only with my son but with the whole family. My son had a surgery last year and it was so hard for me but they were there. They supported me with the emotional part. He had a tumor and had a 14-hour surgery. He is still in physical therapy and Family Focus is still there for me."

"Somebody told me about the program so now when I have the opportunity I also recommend it to everyone that I know who can participate. I came to the program because I want to learn and I want better ideas about how to help my kids. Not only in the education part but the emotional part, too. I'm proud of being a part of Family Focus. Thank you."
